

# INFIGO PRINT MONITORING

According to Print Security 2019 report by Quocirca, disturbingly high **59 % of business reported a print-related data loss!** Organizations are aware of the threat so **66 % rank printing in their top 5 security risks.** Let Infigo help you with that!

Data loss can be devastating for any company, no matter if that data was destroyed or stolen. So of course, companies invest in all manner of security measures – they protect physical access, computer networks, they go to great lengths to protect what is rightfully theirs.

But they often forget one thing – printers. Today, printing is usually monitored but on a basic level; you can see who is printing, the name of the document, and how many pages were printed. But what was in those documents, that is a mystery. You are the owner of those documents, why should that be a mystery?!

With Infigo Print Monitoring all is visible. Even better, all is searchable! Now every time somebody prints a document you will get a copy that will be stored in a database; you can always see who printed what, and what was it. And you can see it to the last letter!

Safeguarding your data and adhering to ever increasing data privacy compliance regulations has become so much easier. Don't wait for printer manufacturers to get your back – **act now and stop worrying!**

## Easy Deployment

Infigo Print Monitoring is easy to deploy – print server manages print jobs and runs print monitoring service that scans and OCRs documents; Print Monitoring Application Server is tasked with storing scanned documents and gives users a front end for supervision with role-based access.

### TRANSPARENT

Infigo Print Monitoring is transparent to the user; workflow doesn't change, there is no extra wait time, and for the user, there is no difference between office with or without Print Monitoring

### OCR

Every document goes through OCR (Optical Character Recognition) and text is made readable and indexable; that means that every document that has gone through the system is also searchable

### SEARCHABLE

Search through everything; you think somebody has printed something confidential? With just one word you can scan through the whole database and find specific document(s) in question

### PDF OUTPUT

Every document is saved as a PDF (Portable Document Format) file, and you decide for how long you want to keep it; retention, and storage space, goes in line with your organization's policies

---

**Your data is leaking by the pages  
with Infigo Print Monitoring it is  
easy to stop the leak**

---

**What happens next is up to you - let us  
make your life easier**
